

## **Iveco's All-Electric Van eDaily 42S Comes From The Factory Exclusively on Continental Tyres**

- **Iveco trusts in Continental's extensive range of summer, all-season and winter tyres**
- **VanContact tyre series convinces with robustness and excellent energy-efficiency**
- **All Continental tyres meet the special requirements of electric vehicles**

Italian manufacturer of commercial vehicles Iveco sets its trust exclusively in Continental for its eDaily 42S van. The premium tyre manufacturer equips the all-electric van with matching summer, all-season and winter tyres. The summer tyre VanContact Ultra is a tyre with a long service life and robust design. The VanContact Eco, also developed for the warm seasons, comes with an excellent efficiency for low energy consumption. For efficient driving year-around, Continental offers the VanContact 4 Season. And the VanContact Winter provides the highest driving safety during the wet and cold months of the year.

### **Summer tyres with robust design and high efficiency: VanContact Ultra and VanContact Eco**

The VanContact Ultra has been specially developed by Continental for delivery services and tradesmen's vehicles. Therefore, the tyre comes with important capabilities for economical driving: high mileage, robust design, low tyre noise and low rolling resistance. To prevent tyres from being damaged by stones that get stuck in the tread grooves, "stone stoppers" are attached in the outer two grooves. These prevent the rubber from interlocking with the stones and ensure that objects picked up by the profile are ejected quickly. And while contact with the curb is often unavoidable during delivery in urban areas, reinforced sidewalls make the VanContact Ultra as robust as possible.

The VanContact Eco is specially designed for energy-efficient driving. The innovative rubber compound ensures a low rolling resistance value and thus improves energy consumption – particularly important for electric vehicles in urban areas with constant stop-and-start traffic. The exceptionally stable tread pattern leads to low tyre wear and thus extends the service life of the tyre. The adapted tread design also offers a high level of noise comfort.

**For the winter season: the VanContact 4Season and the VanContact Winter**

The VanContact 4Season offers year-round efficiency by reducing the energy consumption, as well as having very good braking performance on wet, muddy and snow-covered roads. The tyre also shows excellent handling and equally good braking performance on dry asphalt. With very good properties in all the winter disciplines and in wet, the tyre has been awarded top marks in numerous independent tests.

For the winter season, Continental has the VanContact Winter in its portfolio. The tyre combines snow performance and high safety with steering precision. The tyre's tread pattern ensures a short braking distance on snowy and wet roads. And due to the structure of the tread grooves, the tyre has a high grip and reliable traction on snow.

Continental stands for innovative solutions in tyre technology. In the van segment, the premium manufacturer provides summer, winter and all-season tyres for a wide range of vehicles for commercial and private use. For more than ten years now, Continental's developers have been optimising their tyres to achieve ever lower rolling resistance, low rolling noise and long service lives – with zero compromise on safety. As a result, all tyres developed by Continental not only fulfill the specific needs of electric vehicles but also help to reduce combustion engine emissions.

**These tyre lines and sizes are approved for the Iveco eDaily 42S in numerous countries:**

VanContact Ultra, 235/65R16C 121/119R

VanContact Eco, 235/65R16C 121/119R

VanContact4Season, 235/65R16C 121/119R

VanContactWinter, 235/65R16C 121/119R

**Continental** develops pioneering technologies and services for sustainable and connected mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent and affordable solutions for vehicles, machines, traffic and transportation. In 2022, Continental generated sales of €39.4 billion and currently employs around 200,000 people in 57 countries and markets.

Tyre solutions from the **Tires group sector** make mobility safer, smarter, and more sustainable. Its premium portfolio encompasses car, truck, bus, two-wheel, and specialty tyres as well as smart solutions and services for fleets and tyre retailers. Continental delivers top performance for more than 150 years and is one of the world's largest tyre manufacturers. In fiscal 2022, the Tires group sector generated sales of 14 billion euros. Continental's tyre division employs 57,000 people worldwide and has 20 production and 16 development sites.
