# The new Continental UltraContact NXT.

## German engineered sustainability.

We are incredibly proud of the newest member of Continental's tyre lines, the UltraContact NXT. It is our most sustainable tyre, striking the optimal balance between sustainability, safety and efficiency.

### A high share of recycled and renewable material

Featuring a composition of recycled, renewable and certified materials, the UltraContact NXT guarantees uncompromised safety and performance. The NXT compound and construction features an optimal blend of natural rubber, silicate from the ash of rice husks, recycled PET, recycled steel and more.

### Ultra-long-lasting driving comfort

Enjoy your driving experience relying on a durable and long-lasting tyre. Thanks to our Yellow Chili compound and harmonised tread pattern design, the UltraContact NXT provides you with ultra-high mileage and balanced driving comfort.

### Outstanding performance for your sustainable journey

The EU tyre label awards all sizes of the UltraContact NXT a triple A rating, showcased by a unique absorbing pattern and smart energy construction, indicating the best EU label rating regarding rolling resistance, wet braking, and rolling noise. Trust the UltraContact NXT for a safe and sustainable ride with extended reach, regardless of your destination.

\* ISCC PLUS mass balance approach certified materials from bio-based, bio-circular and/or circular feedstock.

## Dimensions

Tyre width in mm: **205-255**  
Rim size in inches: **16-20**

Tyre cross section: **45-55**  
Speed symbol: **T/V/W/Y**

### EU tyre label values

Fuel efficiency: **A**  
Wet braking: **A**  
Noise level: **A (69-70 dB)**

Maximum safety: Wetgrip label A, best possible EU label rating.

\* Exact percentage depending on tyre size. The UltraContact NXT contains 37% recycled and renewable material. Furthermore, Continental sourced an amount of 28% ISCC PLUS mass balance approach certified materials from bio-based, bio-circular and/or circular feedstock.
