

The right tyre, at just the right time.

The new Conti Eco HS 5.

German engineered fuel saver for mixed regional and long-haul applications.

- Achieve significant savings in fuel and CO₂ emissions with our newly improved compound formula included in all tyre components and designed to reduce rolling resistance while retaining good mileage performance in both regional and long-haul applications.
- Experience remarkable grip, superb handling and even wear throughout the tyre's service life in all weathers thanks to a robust tread pattern designed for regional and long-haul routes.
- Extend the tyre's service life with the casing's advanced retreadability, enabling long-lasting performance that meets your operational needs and environmental responsibility goals.

Generation 5. Together we make a difference.

The new Conti Eco HS 5.

German engineered fuel saver for mixed regional and long-haul applications.

Engineered to save fuel and cut CO₂ emissions.

The new Conti Eco HS 5 combines fuel efficiency and a lighter carbon footprint with a power-packed performance. The optimised compound formula is engineered to reduce rolling resistance. This offers the potential to cut fuel consumption and reduce CO₂ emissions, no matter whether your fleet operates on regional roads or long-haul routes. And thanks to the balanced compound formula, the Conti Eco HS 5 also delivers good mileage.

Master the challenges on long-haul and regional roads - whatever the weather.

The Conti Eco HS 5 features an intelligent pattern structure including full-width 3D matrix sipes that ensure impressive traction over the tyre's entire service life. The innovative tread styling also delivers a balanced performance when it comes to wet grip, even wear and high mileage on both regional and long-haul routes. In addition, the service life of the Conti Eco HS 5 is further extended by our renowned W-groove technology (only available for size 315/70 R 22.5) which enables an even distribution of forces along the groove when cornering, thereby reducing stress on the tyre. It's the kind of reliability that you can feel on every corner and every straight stretch of road, uphill and downhill, ensuring a smooth ride and peace of mind on countless journeys.

Conti Eco tyres live longer.

Thanks to their long-lasting casing with high structural stability, Conti Eco tyres can outlast a single tyre life through retreading, providing additional mileage and a longer service life. This benefits not only your budget but the environment, as well. In addition, our newly introduced 0° belt casing (only available for size 315/70 R 22.5) enables good pressure distribution in the contact patch under changing load conditions, which results in a significant improvement in mileage and even wear.

Tyre Size	LI/SI				M+S	
315/70 R 22.5	156/150 L (154/150 M)	B	B	A/71 dB	●	●
315/80 R 22.5	156/150 L (154/150 M)	B	B	A/71 dB	●	●

385/65 R 22.5	164/000 K	B	B	A/71 dB	●	●

The right tyre, at just the right time.

The new Conti Eco HD 5.

German engineered fuel saver for mixed regional and long-haul applications.

- Benefit from fuel savings and lower CO₂ emissions with the new compound formula in all tyre components, reducing rolling resistance for regional and long-haul operations while retaining good mileage performance.
- Ensure reliable traction on regional and long-distance roads in all weathers with the robust tread pattern, featuring full-width 3D matrix sipes to provide impressive lifetime performance.
- Extend the tyre's service life with the casing's remarkable suitability for retreading, enabling long-lasting performance that meets your operational needs and environmental responsibility goals.

Generation 5. Together we make a difference.

The new Conti Eco HD 5.

German engineered fuel saver for mixed regional and long-haul applications.

Engineered to save fuel and cut CO₂ emissions.

The all-new compound formula and the rolling resistance-optimised casing construction deliver very low rolling resistance which has the potential to boost fuel efficiency and cut emissions while at the same time offering good mileage on both, regional and long-haul roads. So the Conti Eco HD 5 benefits more than just your wallet.

Master the challenges on long-haul and regional roads – whatever the weather.

Wherever you're heading and whatever the weather, the Conti Eco HD 5's robust tread pattern with full-width 3D matrix sipes, ensures strong grip and handling over the tyre's whole service life. Optimised shoulder design with innovative full-width siping in the tie-bars promotes even tyre wear and offers additional traction through enhanced water drainage. This not only improves your vehicle's handling but also extends the tyre's service life. And with an improved pattern design, you also benefit from a convincing performance in terms of noise.

Conti Eco tyres live longer.

Thanks to their long-lasting casings with high structural stability, Conti Eco tyres can outlast a single tyre life through retreading, providing additional mileage and a longer service life. This benefits not only your budget but the environment, as well.
