Technical Training Programme

Commercial

- 1** **NTDA REACT Roadside Safety (1 Day*)**
COURSE OVERVIEW
Industry recognised safety course for technicians working at the roadside.
- 2** **NTDA Licenced Commercial Tyre Technician Cat 1 Truck (2 or 3 Days)**
COURSE OVERVIEW
A course designed for technicians that require recognition of their competence.

A comprehensive practical tyre fitting course which focuses on ensuring all delegates attending have the knowledge & skills to deliver the highest professional tyre servicing standards.
- 3** **IMI Wheel Security (1 Day)**
COURSE OVERVIEW
A comprehensive wheel security course which focuses on ensuring all delegates attending have the knowledge & skills to deliver the highest professional tyre servicing standards.
- 4** **Starter Competence Assessments (1/2 Day*)**
COURSE OVERVIEW
This is an assessment of the competence of the delegate covering the basic skillset of a commercial roadside technician. There is no training element but will give the employer an accurate understanding of the technician's capability and recommended training.
- 5** **Practical Tyre Exam & Diagnosis (2 Days)**
COURSE OVERVIEW
An advanced course in the identification of the root cause of a tyre's failure and compiling a report to effectively communicate the conclusions.
- 6** **Commercial Tyre Repair to the BSau159 Standard (1 Day)**
COURSE OVERVIEW
A course in Commercial tyre minor repairs to BSau159. Covers all of the requirements to safely conduct a minor repair to a commercial tyre.
- 7** **Tyre Fundamentals & Husbandry for Drivers & Managers (1 Day)**
COURSE OVERVIEW
A course in understanding the tyre's contribution and to maximise the tyre's performance and reach minimum overall operating cost for the fleet. Ensure drivers know what to look for and how to behave safely around commercial tyres.
