

# Takes your fleet further. And your performance, too.

## The new Conti Hybrid HT 5.

German-engineered high-mileage tyres.

- ▶ Enjoy outstanding mileage and robustness thanks to a new tread compound formula for demanding regional use.
- ▶ Benefit from safety and efficiency in perfect harmony, with all-weather grip and low rolling resistance for versatile performance.
- ▶ Count on long-lasting performance thanks to a refined tread pattern and a casing specially engineered for even wear and structural stability.

**Generation 5.** Together we make a difference.

# The new Conti Hybrid HT 5.

## German-engineered high-mileage tyres.

The Conti Hybrid HT 5 brings the latest Generation 5 technology to the trailer axle. Just like the Generation 5 steer and drive tyres, the HT 5 is, of course, a tyre – just not like any other. It's specifically engineered to meet the daily demands of regional transport, with a clear focus on mileage and high standards of safety and efficiency. From tread design to compound formula, every detail turns impressive innovation into consistent performance in daily operations. With the HT 5, the Conti Hybrid family is now complete – ready to deliver performance from steer to drive to trailer.

### Engineered for the long run.

In regional goods transport, every mile counts. That's why the tread of the Conti Hybrid HT 5 delivers high mileage and robust performance with a durable compound built for regional operations that also keeps rolling resistance low. The new compound formula maintains the tyre's performance over time, combining endurance with cost-effectiveness at every turn. For lasting reliability – no matter where the journey takes you.

### Versatility at its best.

The Conti Hybrid HT 5 delivers an optimised combination of wet grip and fuel efficiency – making it a versatile choice for regional fleets. Thanks to its refined tread pattern geometry, the tyre offers strong grip, even on wet and wintry roads. At the same time, the new compound formula keeps rolling resistance low, helping reduce your fleet's operating costs. With the Conti Hybrid HT 5, safety and efficiency go hand in hand – supporting smooth and reliable fleet operations centred on regional roads but also covering motorways and light on/off-road routes.

### Great lifetime performance.

The Conti Hybrid HT 5 is built to handle the constant stress of changing routes, varied loads and frequent braking typical of regional operations. Its special tread geometry makes for even wear, while its sophisticated casing structure enhances stability over time. The result is a tyre that lasts longer, wears more evenly and performs consistently – delivering operational savings to your business on everything from major arteries to rural roads. Day in, day out.
